### Egypt - The sound and light show at Horus Temple in Edfu

Once again GRIVEN's LED lighting fixtures have been successfully employed in a sound and light show aimed at enhancing, by night, a cultural and artistic masterpiece of Egypt: the Temple of Horus in Edfu. Batteries of Stroker and Danube units have been installed at the world famous archaeological site located on the river Nile. The Temple of Horus in Edfu is considered the best-preserved cult...

### Powershine in full production mode

Following the overwhelming demand since its last year's world premiere, the made-in-Italy POWERSHINE, the outrageously powerful Griven LED floodlight, is now in full production mode. With international quality certifications already successfully acknowledged, POWERSHINE is now being consigned and turned on to the four corners of the world. As a response to market requests for extremely powerful performances...

### The new indoor LED lighting design collection

An innovative line of energy-efficient LED lighting fittings, recently designed by GRIVEN for the most demanding needs within the field of interior lighting design, was put on display at Light+Building 2010 in Frankfurt am Main last April. A first selection of these lighting fittings for indoor ambiances includes recessed luminaires, suspended downlights, floodlights, wall and ceiling mount fittings,...
