DMX VALUES

COLOSSEO CYM 1000 (HFT) uses 3 channels of DMX.

BLACK-OUT

A simulation of a black-out effect is achieved by the simultaneous closing of all dichroic filters, which is controlled from an external DMX controller.

COLOURS SELECTION

All different shades of colours will be accessed directly in one channel by setting to ON the 62 pre-set colours option on the dip-switch panel.

See following scheme for relevant DMX values:

Function	DMX Values	Notes
Colour 1	0... 3	White
Colour 2	4... 7	Yellow Shade
Colour 3	8... 11	Yellow Shade
